

## Online Banking Alerts

CIBM Bank online banking has new features which allow you to set up account alerts. You can now customize your preferences to the specific alerts you wish to receive.

To set up your online banking alerts, simply log in to your account and click on the “Options” tab. Then select the “Alerts” tab.

Within the “Alerts” tab, there are four different alert types.

### **Alert Name**    **Description**

#### **Events**

Based on an activity or action that may or may not occur on the accounts. You can select the event(s) you wish to be notified of and choose whether you wish to receive an email alert and/or login alert that appears after you login to your account.

#### **Balance**

Notifies you when an account goes above or below a specified balance.

#### **Item**

Notifies you when activities occur to a specific item on your account

#### **Personal**

A customizable alert to notify you of a specific date. You have the ability to insert your personalized details of the alert in a text field.

The screenshot shows the CIBM Bank online banking interface with the 'Alerts' tab selected. The interface displays four sections for setting up alerts:
