# My Online Banking

My Online Banking

Provides a customizable dashboard view of various panel (widget) options.

## My Online Banking Configuration

Use the "Set As Start Page | Configure This Page" option, which appears in the top left portion of the screen, to customize the My Online Banking page.

Set As Start Page: Select to save the page as the landing screen upon login. If left *un*selected, you must actively navigate to the My Online Banking option to access this screen.

Configure This Page: Upon clicking this link, a lightbox window appears allowing control over which widgets to display. Any widgets not currently displayed are listed in the right column of the lightbox window and can be added.

To configure the page:

Step 1: Choose a column to work with from the **Select Column To Configure** drop-down field. The names of widgets (items) assigned to that column appear below.

> My Online Banking has a Left, Center and Right column. The default selection is Left Column. Widgets are pre-assigned into specific columns on the My Online Banking page and cannot be moved to different columns.

Step 2: Add or remove widgets and change the order of display, if desired.

Step 3: Return to Step 1 until all columns have been set up.

Step 4: Click **Save** to retain changes made to all columns. The **Configure This Page** lightbox closes and the My Online Banking page reloads to reflect the changes.
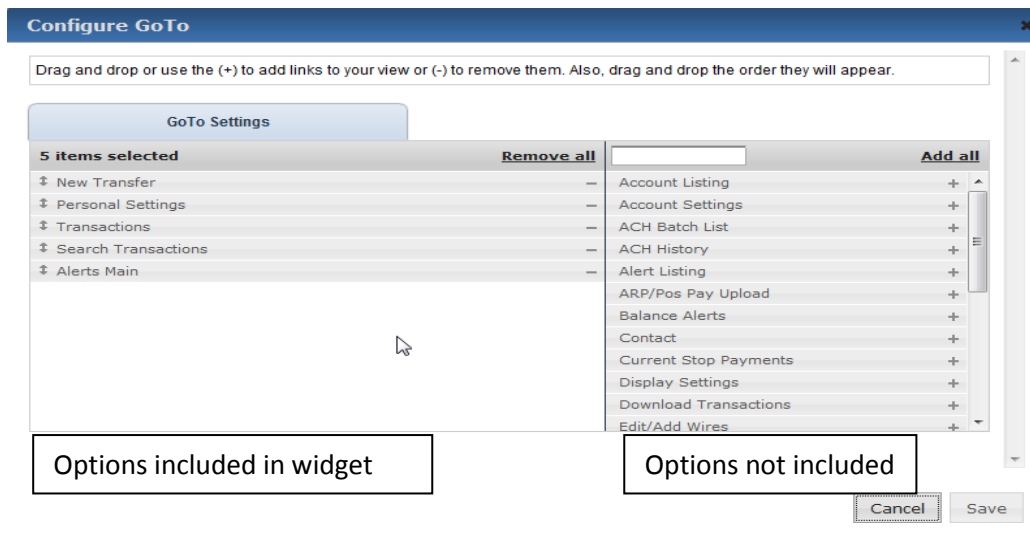

My Online Banking Widget Configuration

While the configuration concept for each widget is the same, the content within the configuration lightbox window varies based on the purpose of the widget.

The Configure icon does not appear on widgets where configuration is not applicable.

To configure a widget:

Step 1: Click the **Configure** 🔵 icon on the widget. The Configure lightbox appears:

Step 2: Review the items being displayed (left side of lightbox) and items not currently displayed (right side of lightbox).

Step 3: Add or remove items and change the order of display, if desired.

Step 4: Click **Save** to retain changes made to the widget. The **Configure** lightbox closes and the widget reloads to reflect the changes.
